CompTIA Network+ Certification Course

Duration: 70 hours

Prerequisites: CompTIA A+ Certification Course *or* CompTIA A+ Certification

Recommended Experience: 6 to 9 months of system administration or networking experience

Course Description: This course provides you with the tools you need to prepare for the **CompTIA Network+** (N10-009) exam – including text explanations, video demos, lab activities, self-assessment questions, and a practice exam – to increase your chances of passing the exam on your first try. *CompTIA Network+* is an extremely valuable IT certification because it ensures that you have in-depth knowledge of how to troubleshoot, configure and manage networks. It demonstrates that you have the skills to succeed in job roles such as network administrator, system engineer, and network analyst. CompTIA Network+ validates the core skills necessary to establish, maintain, troubleshoot and secure networks in any environment, preparing you for a rewarding career in networking and cybersecurity. Upon completion of this course, students will be able to pass the **CompTIA Network+** certification exam. Fees to take the exam are already included in the course tuition.

You can use your *Network+* certification to prepare for other CompTIA certifications such as *Security+* or use your knowledge for certifications that are specific to certain technologies such as Microsoft, VMWare or Cisco.

Students Will Learn

- Fundamental networking concepts, including the OSI model, network appliances, applications, cloud concepts, connectivity options and more
- Routing technologies and important factors of physical installations; configuration of switching technologies and wireless devices
- How to monitor and optimize networks to ensure business continuity
- Understanding of core security concepts and types of network attacks to harden networks against threats
- Troubleshooting methodology and common issues related to networking, including cable, connectivity, and software problems
